PROFESSIONAL SUMMARY

Security Analyst and CompTIA Security+ certified professional with hands-on experience in SOC tooling, Active Directory lab security, and security automation. Currently supporting training environments at Cyber Lancers by deploying Proxmox-based labs, designing AD CTF challenges, and implementing SIEM alert automation. Strong foundation in log analysis, phishing investigation, and compliance-oriented security practices.

SKILLS

SIEM & SOC: Splunk, QRadar, Wazuh, Log Analysis, Alert Triage, Incident Escalation, Phishing Investigation.

Infrastructure & Platforms: Proxmox VE, Active Directory Lab Setup, Linux (Kali/Ubuntu), foundational AWS security concepts (IAM, Security Groups, CloudTrail).

Security Domains: Threat Intelligence, MITRE ATT&CK, Vulnerability Assessment (basic), Email Security (SPF, DKIM, DMARC), CTF Development.

Tools & Automation: Python, Bash Scripting, n8n, SQL, Wireshark, Burp Suite, Caido, Proctor AI.

PROFESSIONAL EXPERIENCE

Cyber Lancers Pvt Ltd | Mysore, India Cybersecurity Analyst | Oct 2025 – Present

- **Infrastructure Automation:** Supported Proxmox-based virtual lab environments and automated provisioning of 60+ student user accounts using Bash scripting. Assisted in implementing a web-based login interface to streamline student access to lab machines.
- **Active Directory Security:** Designed and deployed Active Directory-based CTF lab scenarios focused on privilege escalation and common misconfiguration abuse for training simulations.
- **Email Security:** Identified an email spoofing risk in the corporate domain and collaborated with internal teams to implement SPF and DMARC controls, improving protection against phishing attacks.
- **Security Education & Auditing:** Reviewed and patched vulnerable lab machines (PEH/VulnHub) to ensure stability for student assessments. Evaluated and deployed open-source exam proctoring solutions (Proctor AI).

Finpro Technologies | India (Remote) Cybersecurity Engineer | Jan – Oct (2025)

- Supported ISO 27001 ISMS activities by maintaining asset inventories and asset tagging under guidance.
- Gained practical exposure to technological and organizational security controls through internal training sessions.
- Assisted in preparing ISO 27001 awareness and control-mapping presentations (PPTs) for internal review.
- Studied ISO 27001 clauses, Annex A controls, and risk treatment concepts under senior supervision.
- Developed a foundational understanding of GRC concepts, compliance documentation, and audit readiness processes.

bblewrap | India (Remote)

Cybersecurity Analyst Intern | Jun – Dec (2024)

- Conducted SIEM log analysis and event correlation using Splunk and QRadar to support incident detection and investigation.
- Assisted in reviewing correlation rules and security controls to reduce false positives and improve analyst efficiency.
- Supported vulnerability identification and remediation efforts for the Manappuram Finance MADU application under guidance.

KEY PROJECTS

Phishing Email Analysis Automation (Lab Project) | 2025

- Tech Stack: n8n, VirusTotal, URLScan
- Built a no-code automation workflow using n8n to simulate phishing email analysis in a lab environment.
- Enriched URLs and indicators using VirusTotal and URLScan.
- Implemented conditional logic to differentiate attachment vs non-attachment email flows.
- Configured Slack and email notifications to simulate SOC-style alert escalation.
- Focused on learning phishing triage workflows and SOAR-style automation concepts.

Active Directory Attack Simulation Lab

- Deployed an Active Directory lab environment to study authentication-related attack techniques.
- Simulated Kerberoasting and credential abuse scenarios in a controlled setup.
- Collected and analyzed logs using Wazuh and Splunk to understand attack behavior and detection signals.

Malware Analyzer

- Developed a basic tool for URL and embedded content analysis in a lab environment.
- Integrated reputation checks and pattern-based indicators to assist manual risk assessment.
- Focused on understanding malware triage and analysis fundamentals.

CERTIFICATIONS

- **CompTIA Security+** | CompTIA (Credential ID: COMP001022645550) | *Aug 2025*
- **Google Cybersecurity Professional** | Coursera | *Mar 2024*
- **Ethical Hacking Associate** | RedTeam

- **Ethical Hacking Essentials** | EC-Council

EDUCATION

- **B.Tech, Computer Science** | APJAKTU - SNMIMT (First Class) | *2020 – 2024*
- **Higher Secondary (Plus Two)** | Kerala State Board | 2018 – 2020
- **Secondary School (THSLC / Class X)** | Kerala State Board | 2017 – 2018
